		CPM OS	03.01.3000.0240

Start in **Main**.

Tap **Edit**, **Clear All** and confirm with OK.

Tap **Edit**, **Clear All Variables** and confirm with OK.

Tap **Settings**, **Keyboard**.

You can also press the blue Keyboard button on the handheld unit.

Correct errors by overtyping

Type in 27×36 and tap EXE.

Select the \times in the line just typed by dragging across it.

Tap \div and then tap EXE.

Drag and drop expressions

Select the line $27 / 36$ by dragging across it from right to left.

Now drag your selection into the cursor box on the next line and let go.

Tap  (backspace).

Tap EXE.

Copy and Paste

Tap on the earlier answer of $\frac{3}{4}$ to select it.

Tap on  to copy this fraction.

Tap into the empty cursor box and tap  to paste.

Type $\times 20$ after the fraction and tap **EXE**.

Note: Copy and Paste can also be found in the Edit menu.
