Open the eActivity application and tap **File, New**.

When a new eActivity is created, the settings at the bottom of the screen [Alg, Standard, Real, Deg] for example, reflect the current settings in Main.

Pay attention to whether you have a text or calculation row.

Tap  or  to toggle between modes.

The top screen at right is a text row - notice the cursor **|** and icon .

The lower screen is a calculation row - the cursor is now  and icon .

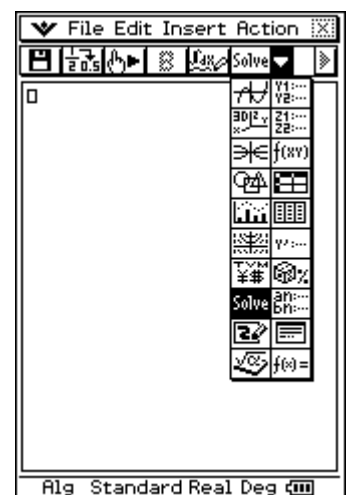

Insert strips in one of two ways:

Tap **Insert, Strip, ...**

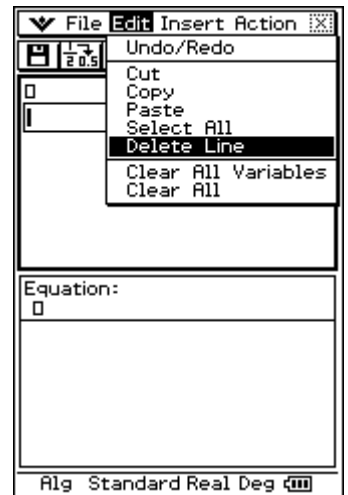

or

Tap the drop down arrow next to  and tap the required icon.

(NumSolve is highlighted in the screen shown)

To delete unwanted lines or strips, place the cursor on the required line or strip and tap **Edit, Delete Line**.

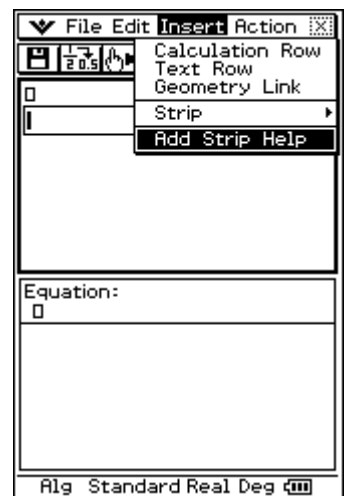

To add strip help text boxes, tap onto the strip.

Then tap **Insert, Add Strip Help**.

Enter tips and so on in the text box.

Open the strip help by tapping onto .

Remove strip help boxes in the same way.

The abc  and  menus have plenty of tools to help you create variables with subscripts, etc.

Tap  to see more...
