

Open the Statistics app.

Tap Edit, Clear All, OK.

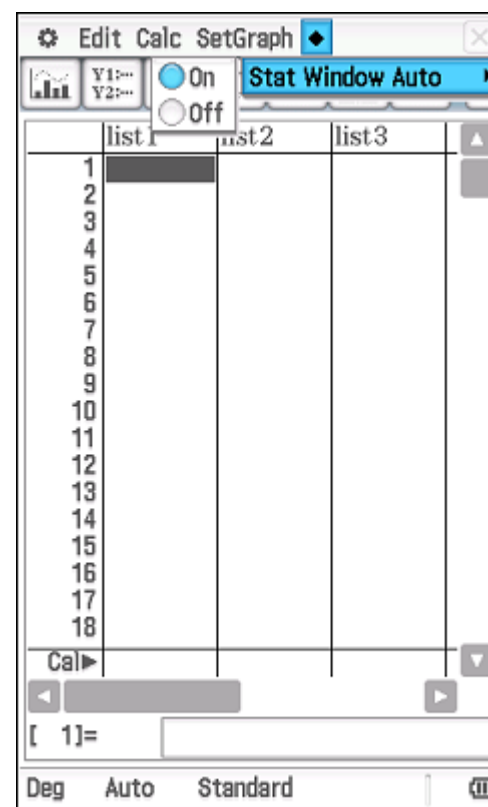

Tap on the  icon. Now tap  and so on to display your choice of 2, 3 or 4 lists on the screen.

Two settings at the bottom of the screen reflect your settings in Main – the angle mode and choice of Standard or Decimal.

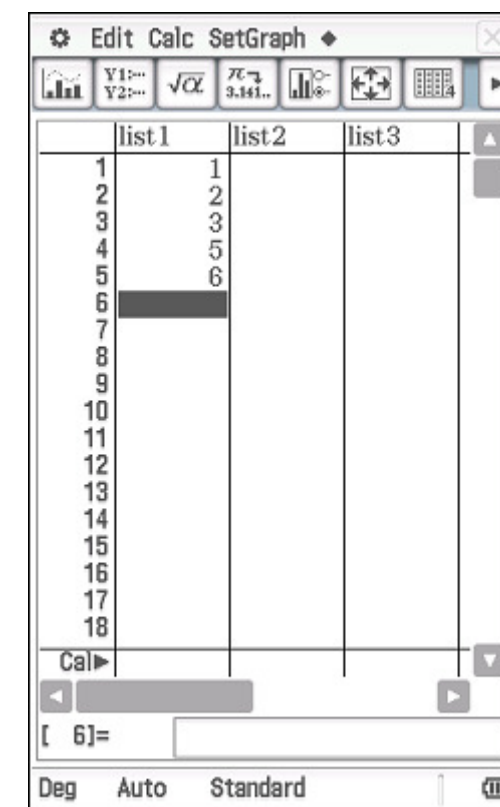

Between them, make sure that Auto is displayed. Auto means that graphs will be auto-scaled.

To turn Auto on or off tap , Stat Window Auto and then tap On or Off.

Type a few numbers into list1.

If you make a typing mistake, tap onto the wrong number and simply re-type the correct value.

To insert an extra number, for example between the 3 and the 5 shown here, tap onto the lower of the two numbers.

Undefined appears in the cell.

To delete an existing number tap onto the number.

Tap Edit, Insert Cell.

Now type in the extra value and tap EXE.

Then either tap Edit, Delete, Cell.

or tap onto the number and press the Clear button.
