

Find the equation of the tangent at the point (3, -3) to the curve $y = x^2 - 4x$.

Enter the expression $x^2 - 4x$.

Tap into the Point box and enter the x-coordinate of 3.

Highlight the expression and tap **Interactive, Calculation, line, tanLine**.

Tap **OK**.

The tangent is given by $y = 2x - 9$.

Here's the graphical view.
